Amazon Prime Subscription Policy

SECTION 1 — BILLING DETAILS

1.1 Subscription Plans Available

The subscription service offers multiple plans designed to accommodate different usage needs. All subscription plans automatically renew unless cancelled before the next billing cycle.

A. Monthly Plan

- **Plan Name:** Monthly Prime Subscription
- **Price:** ₹299 per month
- **Free Trial Duration:** 7 days (available to eligible new users only)
- **Billing Cycle:** Monthly recurring billing
- **Auto-Renewal Behaviour:** Automatically renews every 30 days unless cancelled.
- **Renewal Charge Timing:** Charged on the same calendar date each month corresponding to the initial subscription activation date.
- **Supported Payment Methods:**
    - Credit Cards
    - Debit Cards
    - UPI AutoPay
    - Net Banking
    - Digital Wallets supported within the platform

B. Annual Plan

- **Plan Name:** Annual Prime Subscription

- **Price:** ₹1,499 per year
- **Free Trial Duration:** 30 days for eligible users.
- **Billing Cycle:** Yearly billing.
- **Auto-Renewal Behavior:** Automatically renews every 12 months.
- **Renewal Charge Timing:** Charged at the beginning of the renewal period on the anniversary date of subscription activation.
- **Supported Payment Methods:**
    - Credit Cards
    - Debit Cards
    - Net Banking
    - UPI mandates

C. Student Plan

- **Plan Name:** Prime Student Subscription
- **Price:** ₹149 per month or ₹799 annually (student verification required).
- **Free Trial Duration:** 14 days.
- **Billing Cycle:** Monthly or yearly based on selection.
- **Auto-Renewal Behaviour:** Automatically renews after verification validity period unless cancelled.
- **Renewal Charge Timing:** Charged at the start of the new billing cycle.
- **Supported Payment Methods:**
    - Credit/Debit Cards
    - UPI AutoPay
    - Net Banking

Student eligibility may require periodic verification. Failure to maintain verification may result in automatic migration to the standard Monthly Plan pricing during renewal.

D. Family Plan

- **Plan Name:** Prime Family Subscription
- **Price:** ₹2,499 per year
- **Free Trial Duration:** 30 days.
- **Billing Cycle:** Annual.
- **Auto-Renewal Behaviour:** Renews automatically at the end of each subscription year.
- **Renewal Charge Timing:** Charged at midnight (00:00 IST) on the renewal anniversary date.
- **Supported Payment Methods:**
    - Credit Cards
    - Debit Cards
    - Net Banking
    - UPI mandates

Family plans allow multiple linked profiles under a single billing account.

1.2 Auto Renewal Terms

Automatic renewal ensures uninterrupted access to subscription benefits.

How Automatic Billing Works

- Upon subscribing, users authorize recurring billing through the selected payment method.
- The system stores payment authorization securely and triggers charges automatically at the start of each billing cycle.

Charge Trigger Timing

Charges are initiated:

- At the end of the free trial period, unless cancelled before trial expiry.
- At the exact renewal date and time aligned with the original activation timestamp.
- Renewal billing may occur within a processing window of up to 24 hours.

Users may observe charges slightly earlier or later depending on payment processor confirmation timing.

Cancellation Requirement Before Billing Date

If cancellation is not completed prior to renewal processing:

- The system considers the subscription active.
- Renewal charges are automatically applied.
- Access to benefits continues for the newly billed cycle.

Cancelling after billing does not automatically reverse charges unless refund eligibility conditions are met.

1.3 Billing Scenarios

The following billing situations are common customer support inquiries.

A. Unexpected Charges

Unexpected billing may occur due to:

- Free trial automatically converting into a paid subscription.
- Multiple active plans associated with different profiles under one account.
- Subscription reactivation during a previous billing period.
- Bank authorization holds appearing as finalized charges.

Users are encouraged to review subscription status under Account Settings before raising billing disputes.

B. Free Trial Conversion

Free trials convert automatically into paid subscriptions if not cancelled.

Key considerations:

- Trial expiry occurs at the exact activation timestamp.
- Cancellation must occur before trial expiration.
- Once renewal processing begins, the subscription becomes billable.

Example:

If a 7-day trial starts on 1st March at 5:00 PM IST, billing may initiate on 8th March at approximately 5:00 PM IST.

C. Failed Payment Retry Attempts

If payment authorization fails:

1. The system retries payment automatically.
2. Retry attempts may occur multiple times over several days.
3. Subscription benefits may remain temporarily active during retry attempts.

Possible outcomes:

- Successful retry restores uninterrupted access.
- Continued failure may result in account suspension.

Banks may also charge authorization attempts depending on payment method policies.

D. Mid-Cycle Upgrades or Downgrades

Users may change subscription plans anytime.

Upgrades:

- Higher-tier plan activates immediately.
- Remaining unused value from the current plan may be prorated as credit.
- Additional charges may apply instantly.

Downgrades:

- Lower-tier pricing typically takes effect at the next renewal cycle.
- Current benefits remain active until cycle completion.

Immediate downgrades do not generally trigger refunds unless required under refund eligibility rules.

SECTION 2 — SUBSCRIPTION REFUND POLICY

Refunds are evaluated based on usage status, timing of the request, and billing circumstances.

2.1 Refund Eligibility During Free Trial

Refunds are generally not applicable during free trials because:

- No billing occurs until the trial converts into a paid subscription.

However:

- If billing occurs due to delayed cancellation immediately after trial expiry, refund requests submitted promptly may be reviewed.

Eligible requests must typically be submitted within the defined refund request window.

2.2 Refund Eligibility After Renewal

Refunds following renewal depend on usage and timing.

Refund consideration may apply when:

- The request is submitted within 48 hours of renewal billing.
- Subscription benefits have not been significantly used.

Usage evaluation may include:

- Streaming activity.
- Delivery benefit utilization.
- Profile access activity.

Accounts showing active benefit usage after renewal may not qualify.

2.3 Refund Conditions When Benefits Were Not Used

Refund approval likelihood increases if:

- No content consumption occurred.
- No premium services were accessed.
- No linked profiles used benefits.

The system evaluates usage logs automatically.

Minimal login activity alone does not automatically disqualify refunds.

2.4 Non-Refundable Scenarios

Refunds are typically not granted under the following conditions:

- Subscription used extensively after renewal.
- Refund request submitted after the request window expires.
- Multiple refund requests from repeated renewals.
- Promotional or discounted subscriptions marked as non-refundable.

Completed billing cycles already consumed are considered fulfilled services.

2.5 Partial Refund Situations

Partial refunds may be considered when:

- Subscription upgrades were purchased accidentally.
- Billing errors resulted in duplicate charges.
- Technical service outages significantly impacted access.

Partial refund calculations may consider:

- Remaining unused billing days.
- Value of benefits already consumed.

2.6 Refund Request Time Window

Refund requests must generally be submitted:

- Within **48 hours** of renewal billing for monthly plans.
- Within **72 hours** for annual or family subscriptions.

Requests outside these windows may be denied automatically unless billing errors are identified.

2.7 Refund Processing Timeline

Once approved:

- Refunds are processed within 3–5 business days internally.
- Banking institutions may take additional time to reflect funds.

Typical completion:

- UPI or wallet refunds: 3–7 business days.
- Debit/Credit card refunds: 5–10 business days.

- Net banking reversals: up to 10 business days.

Processing delays caused by banking partners are outside subscription system control.

2.8 Payment Reversal Method

Refunds are issued only through the original payment source whenever possible.

Examples:

- Card payments returned to the same card.
- UPI refunds returned to the originating UPI ID.

If the original payment method becomes unavailable:

- Store credit or alternate refund options may be offered following verification.

SECTION 3 — CANCELLATION TERMS AND PROCEDURE

Cancellation allows users to stop automatic renewals while maintaining transparency about benefit access.

3.1 How to Cancel Subscription

Users may cancel subscriptions through account settings.

Step-by-Step Instructions

1. Log into the account using registered credentials.
2. Navigate to **Account Settings**.
3. Select **Membership and Subscriptions**.
4. Choose the active subscription plan.
5. Click **Manage Membership**.

6. Select **Cancel Subscription**.
7. Review displayed billing information.
8. Confirm cancellation.

Users may be shown benefit reminders prior to confirmation.

3.2 Cancellation Deadline to Avoid Billing

To prevent renewal charges:

- Cancellation must be completed before renewal billing begins.

Recommended practice:

- Cancel at least 24 hours before renewal date to avoid processing overlap.

Cancellation requests submitted during billing processing windows may not prevent renewal charges.

3.3 Immediate vs End-of-Cycle Cancellation

Users may encounter two cancellation behaviors.

Immediate Cancellation

In certain cases:

- Benefits may terminate immediately.
- Remaining subscription period may be forfeited.

Immediate cancellation may apply when:

- Refunds are approved.
- Fraud or account misuse is detected.

End-of-Cycle Cancellation (Standard)

Most cancellations follow this model:

- Subscription remains active until the current billing cycle ends.
- No additional renewal charges occur.

Example:

If a monthly subscription renews on 10th April and cancellation occurs on 15th April:

- Access continues until 10th May.

3.4 Active Benefits After Cancellation

After cancellation confirmation:

- Premium benefits remain accessible until cycle expiration.
- Linked family profiles retain access during this period.

Benefits terminate automatically once the billing cycle completes.

3.5 Confirmation Notification Process

After successful cancellation:

- A confirmation screen appears immediately.
- Email confirmation is sent to the registered address.
- Notification includes:
    - Cancellation timestamp.
    - Last active benefit date.

Users are advised to retain confirmation records for billing inquiries.

3.6 Reactivation Rules

Cancelled subscriptions may be reactivated anytime before expiration.

Reactivation behaviour:

- Immediate restoration of uninterrupted benefits.
- Billing resumes from the next renewal cycle.

If reactivation occurs after expiration:

- A new billing cycle begins immediately.
- Free trials may not be offered again if already used.

3.7 Account Closure Impact

Closing an account without cancelling subscription may not automatically terminate billing authorization.

Users should cancel subscriptions before account closure to prevent unintended renewal charges.
